

✓ TRIED + TRUE

Stefan and White Diamond did a great job for our wedding! He worked with us to make sure the video would have what we wanted. Many of the traditional elements of the party are uncut, including our first dance and toasts from the bridal party.

We would recommend White Diamond and Stefan for any wedding, and would happily work with them again.

My husband and I were really debating on if we wanted to spend the money on a videographer while in the budgeting stages. I couldn't be more pleased and happy we decided to do the video's and chose White Diamond Video. My family was SO happy to receive the highlight videos and all of the footage with the interviews. The packaging looked amazing. They beautifully captured our day and now we can have those memories to look back on forever. Definitely recommend!-making us feel completely natural.

We are so happy we chose White Diamond Video! Thank you!!

Our highlight video & full length video are AMAZING. He truly has a gift. I told him I almost wish we could redo our wedding day just to have another video.

Stefan met all our expectations capturing our July 2017 wedding day. He was extremely professional. He came on time and stayed for the whole affair from pre-wedding prep to the cake cutting. It is obvious that he has a passion for his craft as he used modern techniques and equipment like a go pro to capture the details of our day. The end result was a very personal and unique work of art rather than a cookie cutter video.

Stefan has wonderful editing skills. The highlight video was truly special. It captured and summarized the most tender moments of our special day.

Working with "White Diamond Video" was an absolute pleasure from start to finish. Originally, we were on the fence about having a videographer, but looking back at the entire process, we made the right decision.
